

The Engineer's Choice - Marine & Industrial Applications

Super Metal Repair Systems

Metal Rebuilding System

- Excellent mechanical strength
- Easy machining properties
- Allows repair in one easy application
- Ideal for repairs to pumps, valves, worn shafts & stripped threads

PlasSteel Twist Stick

- Fast curing & will set underwater
- Supplied in the form of a stick
- High physical & mechanical strength
- Developed for on-site repairs to castings & worn threads as well as underwater repairs

ThistleWrap Pipe Repair Tape

- Simple to use
- Rapid curing & moisture activated
- Seal leaking pipes in minutes
- Available in a range of sizes

Ceramic Carbide Repair Systems

Ceramic Carbide Wearing Compound

- Developed for use in fluid flow environments
- High level of abrasion and corrosion resistance
- Optimum physical and mechanical strength

Abrasion Resistant Ceramic Carbide Fluid

- Fluid grade
- Designed for use in fluid flow environments
- High level of abrasion and corrosion resistance
- Optimum physical and mechanical strength

Heavy Duty Ceramic Carbide

- High abrasion resistance
- Reinforced with ceramic & carbide particles
- Excellent erosion and corrosion resistance
- Ideal for equipment subject to aggressive attack from dry solids and slurries

Engineers' Repair Kits

ThistleWrap Pipe Repair Kit

- Seals leaking pipes within minutes
- Water activated pipe repair bandages and fast curing metal repair compounds included
- Repairs tolerant of temperatures up to 270°C
- Up to 5 repairs from one kit

Engineer's 'A' & 'C' Kits

- Solvent free and epoxy based resin and hardener
- Water activated pipe repair bandages, general purpose adhesive and fast curing metal repair compounds included
- Larger 'C' Kit available

Elastomeric Repair Systems

Concrete Repair & Grip Systems

Concrete Patch Repair

- Repairs to damaged and eroded concrete
- Fast setting
- Self-priming
- Good adhesion, abrasion, impact & chemical resistance

Grip-Tech

- Slip deterrent system for mineral and metal surfaces
- Suitable for application in cold damp conditions
- Ideal for steps, ramps, floors, concrete, wood, GRP & tiles
- Use in combination with ThistleBond Grips

'60' Durometer Rapid Paste Elastomer

- Fast curing (Shore A Hardness of 60)
- Developed for the repair of rubber components by trowel/putty knife
- Supplied in a blister pack
- Optimum mechanical strength

Commercial Marine & Chemical Protection

Standard Resin

- Solvent free epoxy for onsite repairs to metal, wood, glass and synthetic materials
- Simple and easy to use in conjunction with ThistleBond reinforcement products
- Excellent adhesion, mechanical and physical strength

Glass Tape

- Glass Tape used in conjunction with ThistleBond repair products to effect high performance, high strength repairs to a wide range of materials and surfaces

Anti-Corrosion Aluminium

- Anti-corrosive coating
- Ideal for marine decks, stairs, railings and steel surfaces
- Ideal for surfaces where surface preparation is restricted
- Good corrosion and weather resistance
- Compatible with existing coatings

Hycote 175

- Solvent free coating
- Exceptional resistance to chemical attack
- Suitable for steel and concrete in total immersion
- Ideal for tanks & pipework
